

Plant Assessments

1 day

Introduction

On site assessment is for operators who are experienced in operating the equipment they are to be assessed on, and must not be confused with training. To this end guidance on the level of competence required before assessments can be carried out on site is set out below.

Operators Requirements

- The operator must be over the age of 21 and have at least two years experience in operating the equipment he or she is to be assessed on
- A good knowledge of the equipment to be operated. This will include details of load envelopes, rating plates, safe working loads and safe working practices.
- They are advised to have attended a Safety Awareness Training Course in the previous two years.

Site Requirements

- An area large enough to manoeuvre and operate the equipment, free from pedestrian traffic and general public.
- Uninterrupted attendance by the operators under assessment

Loads to be moved

- Forklift – a number of palletised/unit loads
- Forklift – facility for high lift, at least 75% of the maximum machine lift
- Dumper – loose material for use in loading dumper
- Excavator – an area for excavating when excavator assessment is required

NB: THESE ASSESSMENTS CAN ONLY BE CARRIED OUT ON MACHINES THAT COMPLY ENTIRELY WITH THE RELEVANT STATUTORY PROVISIONS [ARE THEY LEGAL](#)
