Your Partners in Health, Safety & Environmental Welfare

The Building Safety Group

BSG Risk Management Software

Conducting regular risk assessments is essential for managing the health, safety and environmental welfare of everyone affected by your business. This includes site operatives, sub-contractors, office staff, in-house maintenance teams as well as the general public. It also a legal requirement.

BSG's online 'Risk Assessment Software' (RAS) can help you meet your legal obligations and become compliant with Health & Safety law. Our members regularly log into BSG's system where they can access over 70 different types of risk assessment templates.

Create Risk Assessments specific to your company's construction work

Each BSG template is pre-configured with its own set of unique control measures relevant to the hazard being assessed. Users simply have to apply a risk rating for each hazard appraised, using our 5 x 5 risk evaluation matrix. The matrix will automatically calculate scores accordingly based on risk severity and likelihood.

Users can then apply a residual risk rating once the control measures have been considered. After an assessment has been completed, it can be saved as a PDF before being emailed to the site location where the construction work taking place.

Benefits of using BSG's Risk Assessment Software

- Completing risk assessments with our software will help to ensure your business is compliant with Health & Safety law
- Having a health and safety risk assessment system in place helps you to take control. Our software sets out how to handle key risk management activities
- Using BSG's software allows you to apply a logical and structured process for managing tasks to see what's working well and where improvements can be made
- Improved Health & Safety performance by your company will reduce the costs associated with accidents
- Staff relations and morale are boosted when employees see that you are actively taking an interest in their welfare
- Companies can demonstrate to the HSE and other regulatory bodies that you are actively controlling health and safety risk
- All completed risk assessments can be archived in our system and quickly retrieved as required
- BSG's suite of pre-configured templates can be easily adapted to match specialised tasks for your business
- Our pre-configured risk templates have been created by BSG's highly qualified staff who have extensive experience of working in the construction industry
- You can add multiple users to your BSG software account

- Receive info. about 'HSE Blitzes' planned for your region
- Be invited to attend free BSG seminars to learn more about the Health and Safety issues that affect your business
- Receive a free invitation to enter and attend BSG's annual UK Health & Safety Awards ceremony
- Receive regular BSG 'Safety Alerts'
- Receive BSG's Newsletter which every month provides technical advice about topical health & safety issues

For further details about the membership packages offered by BSG as well as information about our site inspection and consultancy services please visit: www.bsgltd.co.uk or call 0300 304 9070.

The screenshot shows the 'PEM Builders UK (Demo)' interface. It features a sidebar with navigation options: Home, Assessments, and Templates. The main area displays a list of templates with columns for 'View' and 'Copy'. A search bar is visible on the right. Below the list, a risk matrix is shown with 'Likelihood' on the vertical axis (Rare, Unlikely, Possible, Likely, Almost Certain) and 'Severity' on the horizontal axis (Insignificant, Minor, Moderate, Major, Severe). The matrix cells contain numerical risk scores ranging from 1 to 25.

Choose from over 70 pre-configured BSG Risk Assessment templates

Hazard	Risk	Severity	Likelihood	Risk	Controls	Residual Risk	Risk
Falls from height	Serious or fatal injury	5	5	25	Scaffolds must be assembled, dismantled or significantly altered only by persons who have received appropriate and specific training and under the supervision of a competent person. All scaffolds and working platforms will be properly constructed in accordance with British and European Standards, manufacturer's instructions and current legislation. Suitable edge protection shall be provided (i.e. Toeboards and guardrails).	1	5
Materials falling from scaffold structure	Serious or fatal injury	5	4	20	Suitable and sufficient brick guards shall be used to provide additional protection against falling materials; these shall be properly attached to prevent displacement. The dimensions, form, and layout of working platforms shall be appropriate to the nature of the work to be performed. There shall be no dangerous gaps.	1	4
Scaffold collapsing	Serious or fatal crush injuries	5	4	20	Any surface upon which a supporting structure rests shall be stable, of sufficient strength and of suitable composition to safely support the structure and any loading intended to be placed on it to the working platform. Manufacturer's instructions must be available on site if a system scaffold is in use, or designed if not built to these instructions. All scaffolds shall be subject of hand-over certificate and inspected before use by a competent person.	1	4
Plant, vehicles or persons colliding with scaffold	Serious or fatal impact injury	4	4	16	Traffic/protection measures are to be clearly defined and designed to prevent any contact with structures. All scaffolds shall be inspected at regular intervals and exceeding 7 days, after any event, which may have affected its strength or stability, or after substantial alterations etc.	1	4

Use preconfigured BSG control measures to calculate residual risk

About BSG

The Building Safety Group (BSG) is a not for profit organisation which specialises in providing Health and Safety advice to the construction industry. We support over 800 members who operate across 3500 workplaces throughout the UK. Put simply we are the largest Health and Safety consultancy of our kind and recognised as the UK's leading experts in construction safety. We aim to provide the highest standard of service at a more competitive cost.

What BSG members say about us

"With health and safety at the forefront of all that we do, our membership of the Building Safety Group is invaluable to us. The service is first class and is delivered by consummate professionals who are totally in tune with our needs and requirements." **Pearce Construction (Barnstaple) Ltd**

"City & Country is rapidly expanding as a business and we needed a Health and Safety partner that could provide us with national coverage. This is why we selected the Building Safety Group (BSG), who have a UK network of Health and Safety resources that can support our needs as we grow." **City & Country**

"BSG provide an invaluable service for McCarthy and Stone. Their in-depth knowledge, expertise and all round professionalism help to ensure that we are compliant with health and safety regulations." **McCarthy and Stone**
